## CHAPTER 1: INTRODUCTION

In an effort to reduce the cost of student transportation changes to the State laws were made to regulate and administer the transportation of students in vehicles smaller than a school bus. The changes made to the law are in R.I.G.L. **31-22.1**

**Purpose of this manual:** The purpose of this manual is to provide information to companies and those individuals operating pupil transportation vehicles to assist them in complying with all rules and regulations governing the operation of a pupil transportation vehicle. This manual also serves as a valuable tool in assisting perspective pupil transportation license applicants in preparing for the written exam needed to obtain a pupil transportation operator's license. Applicants should familiarize themselves with the entire contents of this manual, focusing on chapter 2, Obtaining a Pupil Transport (pupil transportation) Certificate.

The Division of Motor Vehicles is committed to working with all pupil transportation providers and drivers to ensure that you are in compliance with all Rules and Regulations pertaining to pupil transportation.

If you have additional questions or concerns regarding the information provided in this manual, please contact the Motor Carrier and School Bus Safety Office at (401) 462-5772.

### **What are School Pupil Transport Vehicles?**

A pupil transportation vehicle is a motor vehicle designed and constructed to seat not more than eight (8) passengers in addition to the operator, used by a school committee to provide the transportation services required by law or regulation to students being conveyed along a fixed school transportation route. In particular, such vehicles may be used to provide the transportation services required by section 16-21-1, section 16-21.1-1, et seq. and section 16-24-4 on routes in which only small numbers of students are being conveyed.

### **What are the requirements for a Pupil Transportation Vehicle?**

Vans, sport utility vehicles, and heavy automobiles as defined by applicable federal regulations may be used as pupil transportation vehicles provided that these vehicles meet the highest federal crashworthiness standards for these categories of vehicles. Unless otherwise specifically provided for herein, the provisions of section 31-20-4, et seq. (Special Stops Required) shall be applicable to pupil transportation vehicles. The provisions of section 31-23-42 (First aid kit and heating 18 equipment), section 31-23-42.2 (Power equipment on school buses), section 31-23-54 (Fire 19

extinguishers), section 31-23-55 (Speedometer and odometer) and section 31-23-56 (Stop arm) shall be applicable to pupil transportation vehicles. A pupil transportation vehicle shall not be required to be painted school bus yellow provided it carries a sign in school bus yellow visible from forward and from in back of the vehicle containing the lettering required by section 31-20-4 11. See "Operation of pupil transportation vehicles" (5) for lighting requirements.

### **Operation of pupil transportation vehicles**

No person shall operate any student transportation vehicle, and the owner or custodian of a student transportation vehicle shall not permit the same to be operated to convey students unless the following requirements are complied with:

(1) The operator of a pupil transportation vehicle shall not allow the number of school students riding in the pupil transportation vehicle at any one time to exceed the number of adequate seats therein nor shall the operator drive said bus until each student is seated.

(2) No person shall operate a pupil transportation vehicle referred to in this section, nor knowingly allow any passenger to ride in such vehicle unless the operator and all passengers are wearing a safety belt which is properly adjusted and fastened.

(3) All doors shall be kept closed while the pupil transportation vehicle is in motion.

(4) No fueling shall take place while any pupil transportation vehicle is occupied by students.

(5) Each pupil transportation vehicle shall be equipped with Type I Class A turn signal lamps, which shall have a four-way hazard warning signal switch to cause simultaneous flashing of the turn signal lamps which may be activated when a pupil transportation vehicle is approaching a stop to load or discharge school students and when needed as a vehicular traffic hazard warning. Each pupil transportation vehicle shall also be equipped with front and rear alternating flashing school bus red signal lamps, which shall remain flashing when school pupils are entering or leaving the pupil transportation vehicle. All aforementioned lamps shall comply with applicable Federal Motor Vehicle Safety Standards and any applicable rules and regulations promulgated by the department of motor vehicles. The operator of a pupil transportation vehicle shall cause its headlamps to be illuminated while such bus is in operation.

(6) Any person who operates such a pupil transportation vehicle shall not permit the boarding or discharging of school students there from unless the pupil transportation vehicle is stopped as close as is practicable to the right-hand side or edge of the ways and shall announce when discharging passengers there from that all persons who wish to cross to the other side of the way shall do so by passing in front of the pupil transportation vehicle immediately upon alighting there from. No person shall operate a pupil transportation vehicle on a way after discharging passengers there from unless all persons who wish to cross to the other side have done so. The

monitor requirement of section 16-21-1 shall not apply to pupil transportation vehicles.

(7) Each pupil transportation vehicle shall be required to be equipped with one pair of adequate chock blocks and three (3) flares in compliance with United States Motor Vehicle D.O.T. Safety Standard No. 125, which shall be placed upon the roadway in conformance with section 14 B of chapter 85 when such vehicle becomes disabled upon the traveled portion of any way, and seat belts for each permanent seating accommodation designed and installed in compliance with applicable United States Motor Vehicle Safety Standards.

(8) All pupil transportation vehicles used to transport school students under the provisions of this section shall display sticker as authorized by the department of motor vehicles for a reasonable fee established by the department of motor vehicles.

(9) Only the holder of a Rhode Island chauffeurs license shall operate a pupil transportation vehicle when the vehicle is being used to convey students, who have passed a written test as may be prescribed by the department of motor vehicles.

## **CHAPTER 2 OBTAINING A PUPIL TRANSPORTATION CHAUFFEUR LICENSE AND A CERTIFICATE**

### ***Introduction***

Fixed-route transportation is the transporting of school pupils on a predetermined daily basis to and from a set location for the length of the pupils school year. This includes: transporting from home-to-school and school-to-home, picking up and dropping off at established bus stops, transporting from home-to-school, transporting to an after-school day care, transporting from school to school or a similar type of daily route. The transportation must be provided on a regular basis for the pupil's school year to require a pupil transportation vehicle.

The pupil's school year is the period of time the program is expected to last. The length of the pupil's semester or summer-school program may constitute the pupils school year.

The pupil's school year will be six weeks long if that is the period of time a school program or camp is expected to last. If it is a week-to-week program the period of the pupil's school year will be a week at a time.

### ***Chauffeur Licenses:***

A chauffeur license and a pupil transportation certificate are required to operate a pupil transportation vehicle. In order to obtain a Chauffeur license you are

required to fill out an application entitled Pupil Transportation Chauffeur License. As part of the application process you will be required to take the application to your local police department and have them conduct a local criminal background check (BCI). The application can be obtained by calling 462-5771 or downloading the form from the Rhode Island DMV website at [www.dmv.ri.gov](http://www.dmv.ri.gov).

The fee is \$26.50 to add the restriction to your license.

An applicant for a pupil transportation license must be at least 21 years of age and have had a driver's license for three (3) continuous years.

Note: Operators who hold an active CDL license issued by the Rhode Island DMV may operate a pupil transportation vehicle without a Chauffeur's license but must have an active Pupil Transportation Certificate.

### ***Pupil Transportation Certificate***

Every certificate issued shall have an expiration date. You must have an active certificate to drive a pupil transportation vehicle. Prior to driving a school transportation vehicle transporting school children subsequent to expiration, a new application shall be completed and a new certificate issued.

The following are steps you must follow to obtain a Pupil Transportation Certificate.

- 1) You don't need a Pupil Transportation Certificate if you have a School Bus Driver Certificate.
- 2) Obtain an Application for Chauffeur License and Pupil Transportation Certificate along with the Pupil Transportation Guide. Use the Guide to study for your written test. Both documents can be downloaded from our website at [www.dmv.ri.gov](http://www.dmv.ri.gov) or by calling 462-5771.
- 3) Obtain required references while completing application form.
- 4) Bring application to local police department for them to conduct a criminal background check.
- 5) If the application is approved by the local police you would bring it to the Motor Carrier and School Bus Safety Office in the main office of the Division of Motor Vehicles located at 100 Main St, Pawtucket. Also bring a letter from a sponsor (school department or school bus company) indicating that they are your employer. All applicants are subject to a criminal record check and a driving record check.

- 6) If you are not a Rhode Island resident or have moved into the state recently, you must obtain a certified criminal record check as well as a certified driving record from your current or former home state. These documents must be no more than 30 days old.

### ***Medical requirements***

Due to the fact that many prospective pupil transportation drivers would have difficulty seeing a physician on such short notice, those drivers that are certified prior to 1/1/08 will not have to comply with the physical requirements until they renew their certificate. It should be cautioned however, that if a prospective driver has concerns that he/she may not pass the medical requirements in the future, they shouldn't apply to become a pupil transportation driver during the current year when the medical requirement is temporarily waived.

In the future a medical certification on the pupil transportation application must be completed and certified by a licensed physician. A medical evaluation is valid for 90 days only. A new physical will be required if the examination is older than 90 days. The medical certificate must include a doctor's signature and registration number, or the application will be returned to you.

Note: Applicants who have passed their seventieth birthday and are mentally and physically capable of operating motor vehicle transporting school pupils shall twice annually be examined by a physician to determine such capability.

### ***Renewing a Pupil Transportation Certificate***

You must complete all information required on the pupil transportation renewal application. The completed application must be signed and dated. Incomplete applications will be returned to you. The medical certification must be completed by a physician in order for us to process the renewal. All applicants are subject to a criminal record check and a driving record check.

If your pupil transportation license lapses more than two years, you will be required to once again take the written test.

In addition, an out of state applicant must provide a certified criminal record check and certified driving record annually.

### ***Insurance Requirement***

All owners of pupil transportation vehicles must file a GU1338 insurance document with the Financial Responsibility Office of the Division of Motor

Vehicles prior to having a Special Equipment and Safety inspection. Most of these filings are done by your insurance company.

### ***Disqualification Criteria***

**Competency and Fitness of Applicant (Mandatory Considerations)** - DMV personnel making determinations as to issuance of Pupil Transportation Certificates shall not issue such a certificate to any person determined to fit into the following categories:

- 1) Conviction of or adjudication of two (2) moving violations within a 12 month period during the past 24 months.
- 2) Conviction of or adjudication of three (3) moving violations within a 36 month period.
- 3) Conviction within the past five years of a motor vehicle offense which is a criminal offense in the State of Rhode Island or which, if committed outside the State of Rhode Island would be considered a criminal offense if committed in the State of Rhode Island or conviction within the past five years of an alcohol related driving offense (including refusal to submit to a breath or blood/alcohol test).
- 4) Conviction of a felony (the term conviction shall not include any felony which has been expunged by court order or otherwise rescinded or pardoned).

**Competency and Fitness of Applicant (Discretionary Considerations)** – DMV personnel making determinations as to issuance of a pupil transportation certificates shall review applications for persons who fit into the following categories and, if any of the following considerations apply, a certificate shall not be issued until after a hearing at which it is determined that operation by such a person would not be inimical to the public safety or welfare:

- a. Involvement in three (3) motor vehicle accidents within a two (2) year period;
- b. Conviction of a misdemeanor within a 12 month period or more than one misdemeanor within the last five (5) years;
- c. A license suspension within the past three (3) years.
- d. Where the application contains inaccurate or incomplete information.
- e. Conviction of or adjudication of three (3) non-moving violations within a 12 month period during the last three years (non-moving violations shall not include parking tickets).
- f. Where other information obtained during the course of the application process brings into question the applicant's fitness or competency to transport school children.

## ***Operator Responsibilities***

Pre-trip inspection: All pupil transportation operators are required to complete a daily pre-trip inspection of the vehicle to ensure safe operation.

Pre-trip reports must be recorded and a copy must be present with the operator during daily operation. Operators should immediately notify company officials of any defects.

Operators must check that the following required equipment and vehicle components are present and in proper working order.

1. Tires
2. Lighting Devices
  - a. Headlights (upper and lower beams)
  - b. Directional signals(front and rear)
  - c. Stop lights
  - d. Four-way flashers
  - e. Warning Devices
    - School Bus Sign
    - Alternating Flashing Red Signal Lamps
    - Stop Arm
3. Brakes
  - a. Service
  - b. Parking
4. Mirrors
5. Exhaust
6. Fluid Leaks
7. Doors
8. Windshield wipers
9. Horn
10. Interior of Vehicle
  - a. Seatbelts (Safety Belts)
  - b. Child Seats/Booster Seats (if necessary)
  - c. Door Warning Device
  - d. Clean Interior
  - e. Heater & Defroster
11. Current registration
12. Front & rear license plates
13. Current inspection stickers (safety and emissions)
14. Safety Equipment
  - a. 2 chock blocks
  - b. First aid kit
  - c. Fire extinguisher (properly charged)
  - d. 3 flares or safety triangles

Note: A business may create pre-trip inspection forms to suit the needs and policy of the business. The form must provide a means to check off all items that must be inspected. There must be a place on the form so that the operator can sign and date the daily inspection.

### ***Transporting Pupils***

You must conform to the following rules regarding transport of pupils:

The School Bus sign must be in the upright position.

Drivers are prohibited from: smoking, consuming alcoholic beverages, refueling, using a cell phone, or any other activity that may interfere with the safe operation of the vehicle.

Operators are required to wear a safety belt at all times during vehicle operation. Doors should be firmly closed and locked when transporting school pupils.

Drivers should assist pupils who require assistance when entering and exiting the vehicle.

All passengers must be properly restrained as set forth in 540 CMR 7AA

The driver must not leave the vehicle unattended while pupils are in the vehicle. This does not apply when a driver leaves the vehicle to assist pupils in entering and exiting the vehicle.

Only the driver may occupy the driver's seat.

### ***Approaching, Boarding, Seating, & Unloading Pupils***

- Your responsibility to a pupil starts some distance from a stop. Approach a designated pick-up area with extreme care.
  
- Do not permit the boarding or discharging of school students unless the pupil transportation vehicle is stopped as close as practicable to the right hand side or edge of the ways and you announce when discharging passengers that all persons who wish to cross to the other side of the way shall do so by passing in front of the pupil transportation vehicle immediately upon alighting there from.
  
- While passengers board or exit your vehicle, school bus warning lights must flash continuously.

- Direct or assist pupils immediately to their seats.
- Before deactivating school bus warning lights, make sure all passengers are safely seated and properly restrained.
- You are expected to maintain order. If a pupil presents a disciplinary problem, the pupil should be reported to the appropriate authorities according to procedures established by your employer.
- If you must leave the vehicle to assist a pupil, first secure the emergency brake, shut off the engine, and remove the ignition key.
- Pupil Transportation Operator's must perform a post-trip inspection. Be sure to check for any pupils left on the vehicle.

### ***Seat Belts and Child Restraint Systems***

The seat belt and child restraint state law is effective for pupil transportation vehicle. The entire law including penalties can be found online by accessing the Rhode Island General Laws. A portion of the law is as follows.

**31-22-22 Safety belt use – Child restraint.** – (a) Any person transporting a child under the age of seven (7), less than fifty-four (54) inches in height and less than eighty (80) pounds in a motor vehicle operated on the roadways, streets, or highways of this state, shall transport the child in any rear seating position of the motor vehicle properly restrained in a child restraint system approved by the United States Department of Transportation under Federal Standard 213. If the child is under seven (7) years old but at least fifty-four (54) inches in height, or at least eighty (80) pounds the child shall be properly wearing a safety belt and/or shoulder harness approved by the Department of Transportation pursuant to Federal Standard 208 in any rear seating position of the motor vehicle. For the purpose of this section, applying to all parts of this section, "rear seating position" means any seating positions located behind the driver and front seat passenger. Under this subsection, a child must be properly restrained in the front seat if:

- (i) The vehicle is not equipped with a back seat; or
- (ii) All rear seating positions are being utilized by other children.

(1) In no event shall failure to wear a child restraint system or safety belt be considered as contributory or comparative negligence, nor the failure to wear the child restraint system, seat belt and/or shoulder harness be admissible as evidence in the trial of any civil action.

(b) Any operator of a motor vehicle transporting a child who has attained the age of seven (7) years but is under eighteen (18) years of age in any seating

position within a motor vehicle operated on the roadways, streets, or highways of the state shall ensure that the passenger is properly wearing a safety belt and/or shoulder harness system, as defined by Federal Standard 208.

(2) Any operator of a motor vehicle under eighteen (18) years old shall properly wear a safety belt and/or shoulder harness system.

(3) This subsection applies only to those motor vehicles required by federal law to have safety belts.

### ***Defensive Driving***

Defensive driving is the art of protecting yourself and others from dangerous and unexpected changes in the driving environment. The defensive driver anticipates actions of other road users and is ready to adjust speed and position accordingly. The defensive driver also adjusts to changes in weather and road conditions. The driver can learn to develop defensive driving habits and skills by following the four steps described below:

**Identify:** Locate any hazards in the driving scene by getting the big picture.

**Predict:** Judge where possible points of conflict may occur.

**Decide:** Determine the actions to take and when and where to take them.

**Execute:** Act by maneuvering the car to avoid any conflicts.

This 'thinking-doing' process is called "IPDE." IPDE can help you to avoid collisions. With practice, this process will become automatic. IPDE will help you become a defensive driver.

### ***Sharing the Road with Large Trucks***

The National Highway Traffic Safety Administration warns that big trucks are four (4) times more likely than cars to get into accidents. Trucks are less maneuverable than cars and also come with far bigger blind spots. The first is near the right front fender and wheels. The second is behind the truck. (If it is a tractor-trailer, the blind spot is 30 feet long.) It is up to you to avoid both spots. Be sure not to cruise into a truck's right side. If you find yourself in that position, pull ahead or fall back quickly. As you do, grip the steering wheel firmly, especially if narrow lanes force you to drive close to the truck. The airflow between the two vehicles may tend to draw them together unless you are on guard.

It is just as important never to tailgate. Tailgating can be fatal especially if the vehicle ahead is a tractor-trailer. Stay at least 30 feet back if you expect the driver to see you.

### ***Five Safety Keys to Accident Free Driving***

- 1. Aim high in steering.** Don't look down your fender or hood but ahead at the middle of your driving lane.
- 2. Get the overall picture.** Look ahead a full block in towns and half a mile ahead on highways. You want to see everything in the space you are moving into, along with the cars you see ahead of you.
- 3. Keep your eyes moving.** Don't look at one thing. Look ahead, look at the sides, and look in your rearview mirror.
- 4. Leave yourself an out.** Situations may occur that you don't plan on. Keep plenty of space between you and the next car.
- 5. Make sure they see you.** Don't take for granted that others can see your car. Tap you horn or flick you headlights up and down if you need to.

### ***Pedestrians***

Drivers must watch carefully for pedestrians. Many accidents are the result of pedestrians not paying attention to or entering traffic carelessly. Many other accidents are caused by drivers who fail to yield the right-of-way or do not use caution when pedestrians are present.

Consider the following suggestions for pedestrian safety:

- Drive slowly and remain alert in any areas where there are pedestrians present.
- Watch for pedestrians who are walking against a red light, stepping into traffic from between parked cars, and crossing in locations where there is not a marked crosswalk. Even in situations where pedestrians cross the street carelessly, the driver must always yield.
- Use caution when children are playing in or near the street. Children often move quickly and do not check for traffic.
- Use caution in the presence of elderly pedestrians. They may not be alert to the dangers of traffic situations.
- Do not stop to pick up hitchhikers at anytime.
- Use extra caution when approaching a blind pedestrian. When a pedestrian who has a white cane or is being led by a guide dog is crossing or attempting to cross the street ahead of you, you must stop and yield the right-of-way.

Pedestrians must realize the dangers of walking in traffic and should be aware of the following safety rules and suggestions:

- Always obey 'Walk' or 'Don't Walk' signs.
- If facing a yellow or red light, cross only if a 'Walk' sign is showing.
- When there are sidewalks, pedestrians should not walk on or along the highway. If there are no sidewalks, pedestrians should walk on the left side of the road facing traffic.
- Use crosswalks. The main purpose of crosswalks is to encourage pedestrians to cross only at certain locations where crossing can be made safely.
- When walking at dusk or at night, pedestrians should wear light colored clothing or reflective clothing.

### ***Safe Driving on the highway***

The following are recommendations to be a safe highway driver:

- Drive at or below posted speed limits. Rhode Island law sets speed limits as follows: 25 miles per hour (mph) in residential areas and 50 to 65 mph on most highways.
- Don't tailgate. The easiest way to tell if you are a safe distance from the car ahead of you is the two-second distance rule. If the road is wet or slippery, you will need additional distance.
- Don't drive at the same speed for a long time. Change your speed occasionally on long trips.
- Look behind you now and then in your rearview mirror. Never pass a car until you are sure no one is coming up behind you in the passing lane.
- Always signal before changing lanes. Do this soon enough to let other drivers know what you are going to do.
- Never stop in the traffic lane. Stop on a highway only if you must. Move as far off the traffic lane as you can. If you need help, raise the hood of your car, tie a white cloth on the door handle and stay in your locked car.
- Drive in the right lane unless otherwise posted or if you are passing another vehicle. Making frequent lane changes is unsafe.
- Stop and rest when drowsy. Driving when drowsy is a major cause of serious accidents.
- Slow down and drive with care in bad weather. Icy and snow covered highways can be very dangerous.
- If you miss your exit ramp, go on to the next exit. Never stop and back up to the missed exit.
- Keep your eyes moving, looking at other cars. Always be aware of what is going on around you.
- Give emergency vehicles the right of way at all times. If an emergency vehicle is approaching, pull over, stop and wait for it to pass.
- Be especially careful when buses stop. Passengers may be entering or leaving buses.
- Never take the right of way for granted. The law grants the right of way, but the other driver may not. Yield to the other driver in these cases; it may save a life.

## CHAPTER 3: PUPIL TRANSPORTATION VEHICLE INSPECTIONS

**All inspections** on pupil transportation vehicles will be conducted by the Safety and Emission Control Section located at 325 Melrose St. in Providence. All pupil transportation vehicles will be required to have a combined special equipment and safety inspection annually. On the year that an emission inspection is required the emissions inspection will be included with the safety special equipment and safety inspection.

Due to time constraints “public carrier” stickers will be used temporarily as pupil transportation stickers. We will convert over to an actual pupil transportation sticker at a later date. If there is already an emission sticker on the windshield the pupil transportation sticker will be affixed at the lower right side of the windshield directly above the emission sticker. If the vehicle is not required to have an emissions sticker the pupil transportation sticker will be affixed in the location that an emission sticker would have been placed.

A public carrier sticker does not authorize the vehicle to be used as a pupil transportation vehicle unless the vehicle passes a pupil transportation vehicle inspection and is issued pursuant to that inspection.

No vehicle is allowed to be used as a pupil transportation vehicle if the sticker affixed to the windshield is expired or if the vehicle is required to have a necessary sticker but doesn't have one.

### ***Vehicle Inspection Process***

- The automobile ,SUV or van must have a gross vehicle weight rating of 3,800 pounds or more in order to qualify to be a pupil transportation vehicle.
- Follow the instructions in this manual and the state law to endure that the vehicle meets all of the special equipment requirements for a pupil transportation vehicle.
- File a GU -1338 insurance document with the Financial Responsibility Section of the Division of Motor Vehicles at 100 Main St. Pawtucket Rhode Island 02860. This form can be mailed to the Financial Responsibility Section (FR) by your insurance company but we strongly recommend that you contact FR prior to having the vehicle inspected to make sure the GU 1338 is on file. This document must be on file with FR for us to conduct a pupil transportation inspection.

- Obtain a letter from the school department stating that the vehicle will be used as a pupil transportation vehicle. The letter should have the license plate number and VIN number of each vehicle.
- Call the Safety and Emission Control Section at 222-3884 to schedule an appointment for an inspection.
- Bring the vehicle to the Safety and Emission Control Section located at 325 Melrose St.
- Prior to inspecting the vehicle the Safety and Emission Control Section will verify that the vehicle has a GU1338 on file.
- If the vehicle passes the inspection a pupil transportation sticker (due to time constraints a public carrier sticker will temporarily be used) will be placed on the windshield.

### ***GUIDE TO VEHICLE INSPECTION***

The following tables list the basic vehicle components and required equipment that will be inspected during a pupil transportation inspection. This inspection will include, but will not be limited to the following items:

## I. INSIDE THE VEHICLE

### Item to Check Requirements

- **Floors, including trunk**  
No holes that may allow toxic fumes into the passenger compartment may be present.
- **Brakes**  
Brakes are checked for any throw, grinding or pressure drop, lateral pull of vehicle. The parking brake is also checked for proper operation
- **Seat belts**
- **Rearview mirror/sun visor**
- **Windshield**
- **Two operable windshield wipers**
- **Defroster/heater**
- **Horn**
- **Seats and inside panels**
- **Ignition lock**
- **Speedometer**
- **Instruments, lamps, gauges**
- **Sharp or protruding objects**  
No such defects must be present

## II. ENGINE COMPARTMENT

### Item to Check Requirements

1. Battery
2. Hood latch
3. Steering box

## III. FRONT OF VEHICLE

### Item to Check Requirements

1. Head lights Low and high beam
  - a. Must be in good working order
2. Four way flashers and directional
3. Bumper
  - a. Must be present and in good condition
4. Registration plate
5. Must have a properly mounted plate, operational plate light, and current registration decal

#### **IV. SIDES OF VEHICLE**

##### **Item to Check Requirements**

1. Windows
  - a. Operable
2. Mirrors
  - a. Equipped with a minimum of a drivers side mirror
3. Marker lights
  - a. Must be present and working
4. Tires
  - a. Properly inflated without any fabric showing, Tire grooves (minimum 2/32), No Missing or broken studs/nuts, No Mixing of types of tires, No space saver tires are allowed
5. Fenders
  - a. Tires may not extend beyond fenders. No sharp edges or protrusions
6. Doors
  - a. Must open and close properly and be capable of being firmly latched, All doors must have a buzzer or warning light to warn driver of an open door. The vehicle should also be equipped with child proof licenses.

#### **V. REAR OF VEHICLE**

##### **Item to Check Requirements**

1. Door or Trunk
  - a. Must open and close properly and be capable of being firmly closed or locked
2. Four way hazards/directional/stop lights
  - a. Must be present and working
3. Bumper
  - a. Must be present and in good condition
4. Registration plate
  - a. Must have properly mounted plate, operational plate light, and current registration decal

#### **VI. UNDERNEATH VEHICLE**

##### **Item to Check Requirements**

1. Fluid leaks  
Must not have any visible fluid leaks
2. Front end/suspension systems  
Must be working and in good condition

3. Shocks
4. Muffler/exhaust
5. Springs  
Must be present and in good condition
6. Fuel tanks

### ***Special Equipment to Check***

1. **Vehicle Design.** Must be designed and constructed to seat no more than eight (8) passengers, in addition to the operator.
2. **Stop Arm.** Must be functional and in good working order.
3. **Sign.** The school bus sign must be painted school bus yellow and visible from forward and from in back. The lettering on the sign must be black and not less than 8' in height.
4. **Signal switch.** Each pupil transportation vehicle shall be equipped with Type I Class A turn signal lamps, which shall have a four-way hazard warning signal switch to cause simultaneous flashing of the turn signal lamps which may be activated when a pupil transportation vehicle is approaching a stop to load or discharge school students and when needed as a vehicular traffic hazard warning.
5. **Alternating flashing signal lamps.** Each pupil transportation vehicle shall also be equipped with front and rear alternating flashing school bus red signal lamps, which shall remain flashing when school pupils are entering or leaving the pupil transportation vehicle.
6. **Emergency buzzer** or warning light to alert the driver of any open door.
7. **Safety belts** for each permanent seat designed and installed per U.S. Federal Motor Vehicle (including operator's seat) (FMV) Safety Standards.
8. **Fire extinguishers** Charged and mounted in the manufacturer's extinguisher bracket and located in the driver's compartment in full view of and readily accessible to the driver. The fire extinguisher shall have a minimum capacity of two and one-half pounds (2 1/2 lbs.) and be of a type approved by the Underwriters Laboratories, Inc., with a rating of not less than ten (10) B.C. (RI G.L. 31-23-54)
9. **First aid kit** sufficiently stocked for expected vehicle occupancy.
10. **Flares** Three (3) flares meeting U.S. DOT FMV Must be present Safety Standard # 125, or Triangles
11. **Chock blocks** (2 required)

## **CHAPTER 4: FREQUENTLY ASKED QUESTIONS**

### **Can SCHOOL BUS drivers operate a pupil transportation vehicle?**

Yes.

Any person certified to operate a "school bus" by the Rhode Island Division of Motor Vehicles may drive pupil transportation vehicles.

### **Can a holder of a Commercial Driver's License with a Passenger Endorsement operate a pupil transportation vehicle?**

No.

Holding a Commercial Driver's License with a Passenger endorsement is not sufficient to allow you to drive a pupil transportation vehicle. You must either hold a "school bus" certificate or a pupil transportation certificate from the Division of Motor Vehicles.

### **Do you need a pupil transportation certificate if you are not driving pupils?**

No.

A pupil transportation Certificate is not required if there are no pupils in the vehicle. However, an operator who is driving a pupil transportation vehicle on the way to pick up pupils or has recently discharged pupils must have a valid pupil transportation Certificate.

If you have additional questions concerning pupil transportation licensing, registration, operation or inspection contact Motor Carrier and School Bus Safety Office of the Division of Motor Vehicles at (401) 462-4368
